PROFESSIONAL SUMMARY

Frontend developer with commercial experience building event, music, media, and e-commerce platforms. I work with React, Next.js, and TypeScript to design component-based architectures and integrate REST APIs and WebSocket functionality. My work includes a library of 13+ reusable UI components documented in Storybook.

WORK EXPERIENCE

Akor Direct · Web Development Agency, Poland

Aug 2026 – Present

Frontend Developer

Development of event, music, media, and e-commerce platforms.

- Designed frontend architecture using React, TypeScript, and Feature-Sliced Design (FSD). Implemented a typed API layer from an OpenAPI specification using openapi-typescript and openapi-fetch, with automatic token refresh. Separated business logic from the UI and reworked the API client.
- Built responsive interfaces, forms with React Hook Form / Zod, infinite scroll, and media processing using S3 presigned URLs / Canvas API. Implemented a server-side proxy in Next.js with retries and request cancellation. Used memoization to optimize rendering.
- Participated in code reviews, task breakdown, and API contract alignment with backend developers in an Agile / Scrum team. Used Codex and Claude for development and architectural planning.

ACHIEVEMENTS

- Built a Radix UI component library and documented it in Storybook — **13+ UI components available for reuse**, with usage documentation.
- Designed and built a Socket.IO chat from scratch — **enabled real-time messaging** with delivery and read receipts, and navigation to messages referenced in replies.
- Introduced code splitting and lazy loading with React.lazy / Suspense — **reduced the initial JS bundle by approximately 6.2% (10 KB gzip: from 160.5 to 150.5 KB)**, lowering the amount of JavaScript required for the initial load.

Reference: Dmitry, Director at Akor Direct, Poland.

KEY SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), React Router, HTML5, CSS3, Tailwind CSS, SCSS.

Data & APIs: Redux Toolkit, RTK Query, TanStack Query, REST API, OpenAPI, Socket.IO.

UI & Architecture: Feature-Sliced Design (FSD), Radix UI, Shadcn UI, Storybook, React Hook Form, Zod.

Tools: Git / GitHub, Vite, Vitest, Jest, CI/CD (Vercel), Codex, Claude.
